

Official journal of the  
International Academy for Adhesive  
Dentistry (IAAD)

# The Journal of Adhesive Dentistry

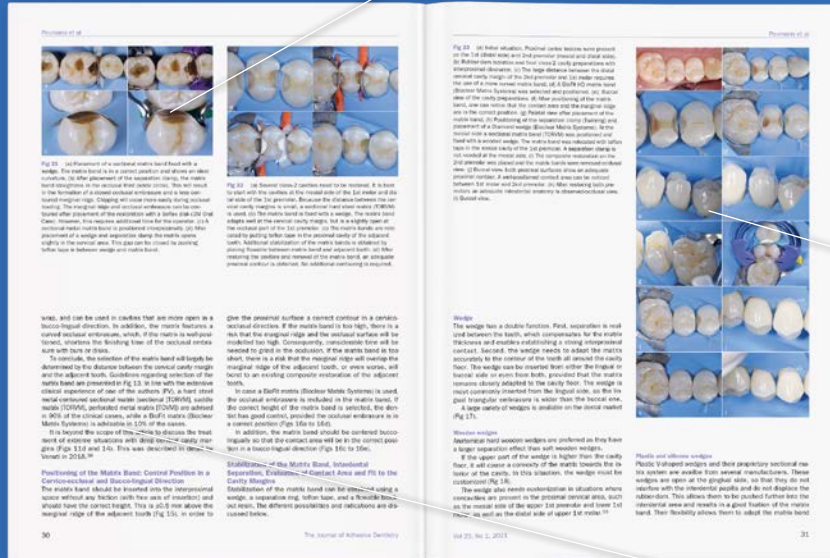

**Editor-in-Chief:** Prof. Dr. Roland Frankenberger, Philipps-University of Marburg, Germany

Prof. Dr. Bart Van Meerbeek, University of Leuven, Belgium

**Area of publication:** worldwide

**Target group:** restorative dentists

**Language:** English

In many cases, adhesive treatments, to which the journal is dedicated, represent a minimally invasive alternative to other conventional methods.

The composite techniques presented are currently used in many different ways in tooth restoration, prevention, esthetics, pediatric dentistry, prosthodontics, and orthodontics. In the future, the use of adhesive techniques will also extend to periodontology and oral surgery.

The journal presents scientifically based articles on current developments in all fields of application, reviewed by a specialist advisory board, and thus providing extensive specialist knowledge for every dentist who wants to extend or improve his or her knowledge.
